 - Laser cutter
 - 3D printer

- ### BOOKBINDING
- Casemakers
 - Casing-in machines
 - Book pressing machines
 - Elastic band inserter

IML S.R.L. "Industria Meccanica Lombarda" was founded in 1947 and is market leader in the manufacturing of metal accessories for the paper converting industry, such as ring binders, lever arch files and related items. With its headquarters, design and industrial area in Offanengo (CR), the modern plant is equipped with the latest technology in manufacturing equipment and offers 360° service to customers all over the world.

The machinery division, originally conceived as a service unit to offer traditional customers solutions for the application of accessories in the stationery industry, has recently been implemented with the creation of the sister company IML Machinery S.R.L. with show room, offices and training facilities at Bovisio Masciago, near Milan.

With this new approach, the company has marked an important footprint not only in the traditional area of paper converting, but also in the bookbinding and packaging industry.
